

Environmental & Climate Responsibility Statement

KY Cravat Manufacturing Ltd. Co.

1. General Commitment

KY Cravat is committed to conducting its business in an environmentally responsible manner. We aim to minimize the environmental impact of our operations while maintaining efficient and high-quality production standards.

2. Energy Use

Our facility primarily uses electricity sourced from the national grid. Energy consumption is monitored internally, and efforts are made to optimize usage through efficient production planning and equipment use.

Currently, no renewable energy sources are used in our operations. However, we are continuously evaluating options to improve energy efficiency and reduce overall consumption.

3. Emissions

Our production processes (mainly sewing and finishing of textile accessories) do not involve activities that generate significant exhaust gas emissions requiring treatment.

The facility operates in compliance with applicable Vietnamese environmental regulations, including the Law on Environmental Protection.

4. Resource Management

We aim to use materials efficiently and minimize waste during production. Basic waste handling procedures are implemented to ensure proper collection and disposal in accordance with local regulations.

5. Continuous Improvement

KY Cravat is committed to continuous improvement in environmental performance. We regularly review our operations and consider practical measures to reduce

environmental impact, including potential future adoption of renewable energy solutions.

6. Compliance

We comply with all applicable local environmental laws and regulations. Our company is also certified under SA8000, supporting responsible and sustainable business practices.

7. Responsibility

Environmental and health & safety responsibilities are assigned to designated personnel within the factory management team, ensuring proper implementation and monitoring of relevant practices.
